The scope of the package Allplan BCM TAI

Allplan BCM TAI enables fast and easy tendering, awarding and invoicing of contracts. Furthermore, you can calculate costs according to DIN 276. Cost plans are evaluated using various analyses based on DIN 276, service areas or the award structure.

Tender with integrated image

Pos.	Bezeichnung	Einheit	Menge	Preis	Werkstoff	Werkstoff	Werkstoff	Werkstoff	Werkstoff	Werkstoff

Short learning curve

Allplan BCM TAI provides you with new, process-oriented help for tendering issues. With this guidance, even new users can get to grips with the program in no time at all. Various templates help you familiarize yourself with the system quickly: you can describe, for example, how a cost estimate or a tender should be compiled. Users can customize or expand templates and then use them as office standards. This allows you to produce tenders and calculate costs even more efficiently.

Professionelle Analysen

Allplan BCM TAI offers a wide variety of reports that allow you to analyze and show costs transparently: from tenders and quantity takeoffs to price comparison lists and cost analyses through to forecasts. In addition, the modern reporting system allows you to add logos and footers to your printouts. Professional reports enhance the image you present to your customers and business partners.
